Product Change Notice - Above floor slide-out motor mount bracket

Dear Valued Customer:

Please be advised we are changing the motor mount brackets on two above-floor slide-out systems from the original welded mount to the new bolt-on mount.

The affected slides are 367242 and 367208. The remainder of LCI's above floor slide-outs are currently using the bolt-on method. The main visible change is shifting the cross shaft 1.75" from the original location.

The change is being made to standardize the product line and streamline manufacturing. There is no change in quality, fit, form, function or installation with the change to bolt-on motor mounts. There is also no price change.

This will be a running change and will be fully implemented by the end of the second quarter or beginning of the third.
