Technical Service Bulletin

SUBJECT: WHEEL CARE: RECOMMENDED CLEANING PROCEDURE
AND CLEANING AGENTS

Description: This bulletin provides information on wheel cleaning procedure and cleaning agent recommendations.

Applicable Vehicles: All 2017-2018 Genesis G80 (DH) and G90 (HI)

Recommended Cleaning Agents and Procedure: Clean with mild soap or neutral detergent with a soft towel, and rinse thoroughly with water. After driving on salted roads, clean the wheels.

Non-Recommended Cleaning Agents: Abrasive cleaner, polishing compound, solvent, or wire brushes or cleaning agents containing acid, alkaline and/or fluoride on the wheels. These cleaning agents may damage and/or corrode the clear coat finish of the wheels.

Clear Coat Finish Damage/Corrosion

Circulate To: General Manager, Service Manager, Parts Manager, Warranty Manager, Service Advisors, Technicians, Body Shop Manager, Fleet Repair
