Aftermarket Power Distribution Module (PDM) Options

For certain Western Star 4700 or 5700 vehicles, power distribution modules (PDMs) are typically ordered in the aftermarket by serial number and populated with fuses and circuit breakers. It may take up to three weeks for a serial number specific PDM to be processed, made, and shipped to a dealership.

In order to reduce the down time of a vehicle, an alternative PDM may be ordered fully populated with fuses and circuit breakers and delivered the next day. A cost increase may be associated with this option.

Both PDM options have identical repair procedures.

Table 1 lists the serial number specific and alternative part numbers for PDMs.

Power Distribution Module Replacement Numbers		
Serial Number Specific Part Number	Part Name	Alternative Part Number
A66-11814-000	Power Distribution Module #1	A66-11814-001
A66-11815-000	Power Distribution Module #2	A66-11815-001
A66-11821-000	Power Distribution Module #3	A66-11821-001
