NEW DIAGNOSTIC SOFTWARE 2020-9.1 RELEASE

Triumph has released version 2020-9.1 of the diagnostic software. It is now available to download and update on your workshop PC. Please download (from the Triumph Diagnostic Software page under the Service/Technical menu) today and commence using with immediate effect.

- Please ensure all new bikes have the latest software downloaded at PDI.
- Please ensure the latest software is downloaded on all bikes being serviced.
- **PLEASE ENSURE ALL RELEVANT STAFF ARE INFORMED OF THIS UPDATE.**
(remember to update those returning from holidays/absence)

The release notes are stored and available to download at any time from the dedicated TDT page within TOL. Below is a summary of the changes in this latest version.

1. NEW SOFTWARE FUNCTIONALITY

- TFT Instrument Downloads - Background Download Workflow Updated

There are three main components downloaded when performing TFT instrument downloads:

- o Bootloader software
- o Application software
- o Calibration files (Calibration IDs 1-3)

A new download workflow is now applied when downloading Instrument calibrations using the Automatic Model Detection method.

This workflow change has been introduced to handle bootloader and application software updates more efficiently, and to minimize download times where possible.

See attached full [TDT ReleaseNotes](#) with [Model Detection Flowchart](#)
