Programming I-Level F001-20-07-521 Execution block

Situation

An issue has been identified concerning the programming of all Ghost, Wraith and Dawn RR4/5/6 model variants with ISTA4.25 which includes vehicle software version **F001-20-07-521**. An execution block has been implemented. When prompted by ISTA please program with alternative I-Level vehicle software version **F001-20-03-540**.

Note: For the few vehicles affected by a technical campaign that requires **F001-20-07-521** to be programmed for the repair and can therefore not be completed due to this block, please follow the 'missed campaign' exemption process.

Contact Information:

If you have further questions, please contact your Regional Aftersales Manager (RAM).
