Case Number: S1908000022 – REV. A

Release Date: 09/03/2020

Symptom/Vehicle Issue: Navigation Search Feature Does Not Work

Discussion: A customer complains about the Navigation search feature not providing results on the 12 inch radio display. (COBS – Connected One Box Search)

This feature was deactivated with radio software 28.1 software level and vehicles built after January 2019. This feature was made available to radios at software level LR33.3.

Note: It also requires the customer to have an active Sirius Guardian subscription for the COBS online feature to work. Verify customer has active Sirius Guardian subscription.

To test for an active XM Guardian subscription, one can press the “Assist” button on the overhead console. If active, you will be connected to an agent to verify the subscription. If not active, you will receive a prompt on the radio screen with instructions to activate. Or check on Dealer Connect, Service, Single VIN Inquiry, under Uconnect Status.

The behavior of the COBS (Connected One Box Search) system can be confusing to the customer. If the customer types in an address in the search window, this activates the COBS system and **COBS attempts to search the internet** if a cell signal is present.

If a cell signal is not present, then the COBS system looks for the address or POI (Point of Interest) on the around the current location (Around Here) and if it's unable to locate the address, the radio can become unresponsive while the system is searching and it appears to the customer that a NAV lockup has occurred.

If the customer does not have a Sirius Guardian subscription, the radio will not be “online” and will show a message “**Searching Offline**” after initiating a search.

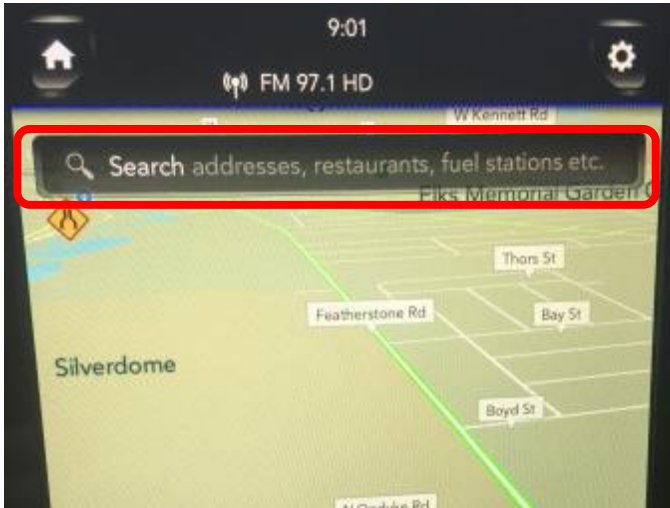

Resulting messages may include “Invalid Search” , “No Matching Results”, “Unknown Error”.

These messages are per design since the VIN may not be registered on the Sirius XM server for the feature. See photos below.

This document does not authorize warranty repairs. This communication documents a record of past experiences. STAR Online does not provide any conclusions about what is wrong with the vehicle. Rather, it captures all previous cases known that appear to be similar or related to the vehicle symptom / condition. You are the expert, and you are responsible for deciding on the appropriate course of action.

Enter address through Steering Wheel VR button Navigation (4C NAV)

The Uconnect navigation feature helps you save time and become more productive when you know exactly how to get to where you want to go.

1. To enter a destination, push the VR button . After the beep, say: " **Find address** 800 Chrysler Drive Auburn Hills, Michigan."
2. Then follow the system prompts.

TIP: To start a POI search, push the VR button . After the beep, say: " **Find nearest** coffee shop."
