

WLJ9 Workshop campaign with customer letter - Tightening screws on rear spoiler blade

Version 1

Overview

There is a possibility that a fastening screw on the rear spoiler blade screw connection was not screwed to the drive unit for the rear spoiler using the specified tightening torque on the affected vehicles.

As a result, the possibility that this fastening screw will loosen over the service life of the vehicle cannot be ruled out.

The screws on the rear spoiler blade must therefore be tightened to the specified tightening torque.

Model type	Taycan (Y1A)
Model year	2020
Number	113

Warranty processing

Validity:

This workshop campaign will be carried out up to 01.10.2025 and will be closed by the specified date. Please note that warranty claims can only be processed before this date.

Scope 1: Only valid for vehicles affected by the Stop Sale Campaign

Damage Code	WLJ9 66 000
Repair Code	1
Working time	69 TU

Please enter the campaign that was carried out in the Warranty and Maintenance booklet for the vehicle.

Porsche Mobility

If requested, the mobility of the affected customer can be assured by offering a suitable replacement vehicle.

Please invoice this additional service with the campaign scope via WWS.
