Customer statement / workshop findings

Possible brake squeal in certain conditions.

Technical background

A dynamically adjusted high-performance brake system is fitted on the new Continental GT for a high braking performance and an appropriate pedal feel. As a result of this braking performance brake noises or vibrations from the brake system cannot be completely ruled out under certain unfavourable environmental or driving conditions.

Production change

.

Measure

Upon customer complaint, raise a DISS technical query and provide a noise recording using Chassis Ear Kit WT 10437.
