POWERTRAIN

Check Engine Lamp

18 MY Range Rover, RR Sport, Discovery

Customer Voice:

- The Check Engine Lamp is illuminated.

Technical Description:

- DTC(s) P0442, P0456, and/or P0457 are stored in the PCM.

Status:

- The subject of EVAP leaks is currently under investigation.
- Complete the guided flow "DMTL Leak Test" in Pathfinder.
 - Only if instructed by guided flow, replace the part identified.
 - Before removal of the original leaking part, take a photo of the component installed on the vehicle.
 - Remove the part from the vehicle and take photos of the component off the vehicle. Replace the component as necessary.
 - Hold the original part and create an EPQR so the part can be returned for analysis.
