2021 Arteon Service Reminder Reset

Resetting the service reminder display

If the service was not performed by an authorized Volkswagen dealer or an authorized Volkswagen Service Facility, the service reminder can be reset as follows:

- Switch the ignition off.
- Press and hold the **0.0** button in the instrument cluster.
- Switch the ignition back on.
- Release the **0.0** button when one of the following messages appears in the instrument cluster display: **Reset oil change service?** or **Reset inspection service?**
- Press the **0.0** button in the instrument cluster to confirm.

Do **not** reset the service interval display between service intervals; or incorrect information will be displayed.

If the oil change service was manually reset, the service interval display then also switches to a fixed service interval, even on vehicles with **flexible oil change service**.

The service message turns off after a few seconds when the engine is running or if you press the **OK/RESET** button on the windshield wiper lever or the **OK** button on the multi-function steering wheel.

If the 12 V vehicle battery in a vehicle with flexible service was disconnected for an extended period, the time for the next service cannot be calculated. Therefore, the service interval displays may show incorrect calculations. If this is the case, follow the maximum permissible maintenance intervals.

For current fluid capacity charts, please refer to the Maintenance section in Elsa.
