Low coolant sensor New Cascadia Nov 17, 2020 8:14 AM

2020 Cascadia, with ISX. Vin JJ1284.

We changed the surge tank on this truck, part # A05-32836-000. The Low Coolant Sensor would not fit on the new surge tank. Checked the part number of the low coolant sensor, part# 06-93316-001. According to Parts pro, it's the correct sensor. I found a sister truck in the yard and removed the low coolant sensor. The low coolant sensor has the same part number, but is 1/4 inch shorter. The sensor from the sister truck works with this new surge tank. Has anyone ran into this? Is there a part's bulletin update for the low coolant sensor?
