2018-2020	RC F		

CONDITION

NOTE: This document **ONLY** applies to **2020 ES & 2020 NX** vehicles built before **10/01/2019**.
(Vehicles built after that date use AT&T WiFi, not Verizon)

Head unit telematics services become inoperative after DCM replacement and activation if the guest has an **ACTIVE** Verizon Wi-Fi pre-paid subscription. Head unit services include Wi-Fi, Destination Assist, Dynamic Navigation, and Dynamic Voice Recognition.

Verizon is not able to transfer the pre-paid subscription to the new DCM automatically. As a result, the guest is unable to use their head unit telematics services. At this time if the DCM is replaced and activated before confirming the guests Wi-Fi subscription status, this may require Verizon's IT to perform a manual fix on the customer's account.

To simplify the diagnosis and prevent the unnecessary replacement of parts, please refer to the procedure below.

NOTE: This Tech Tip does not apply if the guest is currently under their Wi-Fi trial.

RECOMMENDATIONS

- Before performing DCM replacement and activation, verify with the guest whether they have a pre-paid Verizon Wi-Fi subscription.
- If the guest is unsure of the type of Wi-Fi subscription or does have a pre-paid Wi-Fi subscription, have them call the Verizon Specialty Team at 1(877) 211-3433 to confirm subscription status. Verizon may need to cancel the Wi-Fi service prior to DCM replacement and activation. Also, please have the guest reference this Tech Tip number when calling Verizon.
- If the Wi-Fi service was cancelled prior to replacement and activation, please instruct the guest to sign up for a new Wi-Fi subscription. *(See Wi-Fi Sign-Up Options Below)*

RECOMMENDATIONS

1. Turn on the Wi-Fi Hotspot in the vehicle and connect a device to be redirected to the Verizon Wi-Fi Sign-Up Portal.
2. Visit the Verizon Connected Car website: <https://www.verizon.com/plans/connected-car/>
3. Call Verizon at 1(866) 484-9161
