Propane System Failure 2018 Plateau FL

Manchester as indicated by you will send the replacement solenoid and valve. This will be replaced under warranty. Also the line from the solenoid valve to the regulator should be replace this as well will be done under warranty.

Have the dealer that will work on the vehicle give us a call we can work out the payment details with a visa card.

It sounds like at some point the LP tank was over filled and fluid got into the valve, line and regulator.
