

### **SSM 49418: Expedition/Navigator With Four Wheel Drive IWE Electrical Connector Not Equipped**

Some 2020 Expedition/Navigator vehicles built on or after 19-Oct-2020 and equipped with four-wheel drive will keep the integrated wheel end (IWE) hubs engaged under all operating conditions. Although the IWE vacuum solenoid is still present, these vehicles may not be equipped with an electrical connector for the IWE vacuum solenoid. This is a characteristic of the vehicle. Do not attempt any repairs for this condition.

#### **Vehicles:**

2020 Expedition (U553) (B8)

2020 Navigator (U554) (B9)9
