M2 ICU with the markers down Nov 30, 2020 4:40 PM

Hello everybody, We have a problem with a unit M2, the ICU not operate the measure markers are down, only work the fuel level and air pressure, also it shows three intermitent codes 2633/9 (not active); 523515/3 (previously active); 84/19 (previously active) and we not found any solution, did you had been the same problem before ?

Re: M2 ICU with the markers down Nov 30, 2020 7:19 PM

SPN 523515/ FMI 3 is J1939 Performance Voltage above normal. SPN 84/ FMI 19 is a issue with the transmission Vehicle speed received Data Error. I did not find information on 2633. But from what I am seeing here you have a J1939 issue. Do you have a VIN?
