Fuse to be Installed at PDI

Most vehicles have 1 fuse removed at the factory. Some vehicles have 2 fuses removed that must be installed at PDI.

1. All vehicles - Fuse F27 (25A) is removed from the engine compartment fuse block and is stored at the engine compartment fuse block lid.
2. Some vehicles - Fuse F7 (25A) is removed from the interior fuse block left side and is stored in the lower panel compartment on left side of the steering wheel.

- a. Open the driver's door.
- b. Locate the fuse box, which is along the bottom left side.
- c. Open the fuse box by holding the fuse box lid with the right hand and pressing on the clip with the thumb to release the cover.
- d. Remove the clip on the sides and carefully pull the lid out.
- e. Locate the 15 amp blue colored fuse hidden in the lower panel compartment on the left side of the steering wheel.
- f. Avoid touching the metal tabs of the fuse and carefully install the fuse into empty space F15. Space F15 can be verified by referencing the inside of the fuse box lid.

NOTE: Make sure the fuse is installed fully into position and flush with all of the other fuses.

- g. Reinstall the fuse box lid in the reverse order of removal.

CAUTION: Wait a minimum of 5 seconds after installing Fuse F7 to open the liftgate. DTC B1277:14 may be stored and/or back-up lights may be inoperative if you do not wait.

NOTE: Check for Connected Vehicle signal after installing room fuses. See the image below for how the connectivity signal bar looks (it's the vertical stack bar on the right bottom corner). This connectivity signal bar is not displayed on the "Home" screen. Go into the "Entertainment" or "Navigation" menu to check it. To confirm it is working properly, the bar should be white like the image below.

Auxiliary Key

The auxiliary keys need to be inserted into the transmitters during PDI.

Auxiliary Key	Transmitter
 <p>NOTE: The auxiliary keys are small and could be overlooked during PDI.</p>	

Vehicles arrive at the dealer with Auxiliary Keys located in the glove compartment*

Vehicles arrive at the dealer with one transmitter located in the front cup holder*

The 2nd transmitter is located near the spare tire (A) or next to the jack (B).

See Owner's Manual - Before Driving - Keys- [Auxiliary key](#)

CONSUMER NOTICE: The information and instructions in this bulletin are intended for use by skilled technicians. Mazda technicians utilize the proper tools/equipment and take training to correctly and safely maintain Mazda vehicles. These instructions should not be performed by "do-it-yourselfers." Customers should not assume this bulletin applies to their vehicle or that their vehicle will develop the described concern. To determine if the information applies, customers should contact their nearest authorized Mazda dealership. No part of this bulletin may be reproduced in any form or by any means, electronic or mechanical---including photocopying and recording and the use of any kind of information storage and retrieval system ---without permission in writing.

*Vehicles that arrive at the dealer after business hours, one transmitter and auxiliary keys are located in the dealer's early bird key drop box.

Insert the auxiliary key into the transmitter.

Remove the transmitter lower cover by sliding the knob in the direction shown and then sliding the cover in the opposite direction.

Insert the auxiliary key.

Install the transmitter lower cover by inserting the tabs of the lower cover into the slots of the transmitter.

1. If one transmitter is lost, inform the customer to take cautions not to lose the 2nd transmitter.
2. If both transmitters are lost, the vehicle will be disabled. Use MDARS to program new transmitters.
3. Replacement battery type is CR2032 (3V, 225mAh), which is different than previous 6th generation transmitter battery type CR2025 (3V, 160mAh). If the wrong battery is installed, the transmitter might not work properly (malfunction).

CONSUMER NOTICE: The information and instructions in this bulletin are intended for use by skilled technicians. Mazda technicians utilize the proper tools/equipment and take training to correctly and safely maintain Mazda vehicles. These instructions should not be performed by "do-it-yourselfers." Connected Vehicle

1. Connected Vehicle App remote requests below may take up to a minute to complete.

1. Engine Start
2. Engine Stop
3. Door Lock
4. Door Unlock
5. Quick Flash/Horn On
6. Hazard Off

2. Connected Vehicle App status is not updated in real time for the items below. Updates may take several minutes and may require a manual refresh.

1. Tire Pressure Status (last key cycle)
2. Doors
3. Trunk/Liftgate
4. Hood
5. Hazard Lights

NOTE: Tire pressures on the app are from the last time data was received before the ignition was turned off.

3. Multiple remote requests failure

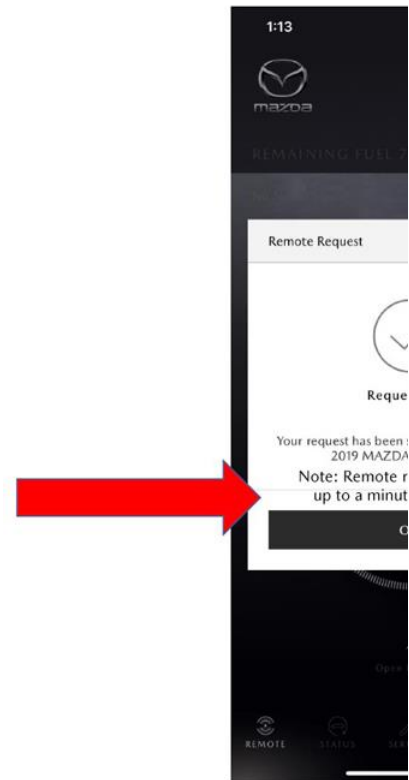

1. Only a single request can be processed per minute.
2. Error messages are displayed if multiple requests are sent within 60 seconds.

In-Vehicle Digital Owner's Manual

The in-vehicle digital OM can be displayed on the center display while the vehicle is stopped. Customer can search descriptions and watch videos of vehicle features and functions by operating the commander switch.

**NOTE:**

1. The digital owner's manual must be installed during PDI. Due to printing deadlines and later updates to the digital manual, the content of the digital manual may differ from the printed manual.
 1. DO NOT use the same file as Mazda3. Check [MGSS](#) and retrieve the correct file for the CX-30.
2. USB memory flash drive FAT16 or FAT32 format is required for installation.
3. The vehicle's infotainment system will only accept file names [contents.tar] and [contents.sig]. File names with additional suffixes will not be accepted.
4. The infotainment system may inadvertently be powered OFF if the diagnostic assist function buttons are not pressed correctly. Simply press and hold the volume knob to power back ON.

Power Door Locks

Doors cannot be unlocked using the outside door handle touch sensor
The door handle touch sensor system may not operate normally under the following conditions:

1. The front passenger (without key) grabs and holds the outside door handle before the driver (with key) touches the drivers outside door handle unlock touch sensor.
2. The driver touches the sensing area of the door lock touch sensor and the sensing area of the door release touch sensor at the same time.

See Owner's Manual - Before Driving - [Doors and Locks](#)

Walk-Away Auto Lock Function

A beep sound is heard when all doors and the liftgate are closed while the transmitter is being carried. All the doors, fuel-filler lid, and liftgate are locked automatically when the transmitter is out of the operational range. Also, the hazard warning lights flash once. (Even if the driver is in the operational range, all the doors, fuel-filler lid, and liftgate are locked automatically after about 30 seconds.) If you are out of the operational range before the doors and the liftgate are completely closed or another transmitter is left in the vehicle, the walk-away auto lock function will not work. Always make sure that all doors and the liftgate are closed and locked before leaving the vehicle. The walk-away auto lock function does not close the power windows.

Operational Range

See Owner's Manual - Before Driving - [Doors and Locks](#)

- 1. Exterior Antenna
- 2. 31 in (80 cm)
- 3. Operational range

Scenarios Where Walk-Away Lock Function May Not Work

	Scenario	Reason	Solution
1.	Key transmitter is outside of antenna range while any of the doors have not been closed.	1. By the time all the doors are closed, the key transmitter is already out of operational range, causing walk-away lock to not function.	Always make sure the key transmitter holder is in operational range and is the last person to leave after all doors/trunk/liftgate are closed.
2.	Key transmitter holder exits driver's door then opens rear left door to retrieve items.	1. Depending on the key transmitter holder's distance to the antenna when he/she is closing the driver side rear door, the walk-away lock may or may not function. 2. If standing closer to the rear bumper area when closing the rear door, the key transmitter may be	Be mindful of the key holder's position in relation to the door exterior antenna (31 in).

		<p>out of the operational range, causing walk-away lock to not function.</p> <p>3. If standing closer to the B-pillar when closing the rear door, the walk-away lock should function correctly.</p>		
3.	Key transmitter holder moves out of operational range too quickly.	<p>1. If the key transmitter holder is in a hurry to get out of the car and leaves the operational range too quickly before the audio beep, the walkaway lock function may not work.</p> <p>2. The key transmitter holder opens the driver's door, gets out, and walks away at a fast pace while shutting the door. It is possible that by the time the door is completely shut, the key transmitter holder is already out of operational range because she/he is moving away too fast, causing walk-away lock to not function.</p>	<p>Slow down and make sure the audio beep sounds before leaving the operational range, the audio beep sound will always sound to alert the key transmitter holder that the key was detected for walk-away door lock function.</p>

Transmitter Battery Saving Function (Key Fob)

The CX-30 has a "power saving" function built into the keyless entry system where some key fob functions are disabled. This feature could accidentally be enabled and some concerns with the vehicle may be:

1. Engine does not start.
2. Engine does not start unless you hold the fob to the start/stop button.
3. Doors do not unlock using the door handle, but unlock with the remote.
4. Doors do not lock using the door handle, but lock with the remote.
5. Transmitter indicator light does not turn on/flash.

See Owner's Manual -

Before Driving - Keys - [Power saving function](#)

Keyless Entry Using Auxiliary Key

If the vehicle battery is discharged and/or the key battery is dead, vehicle entry is possible using the auxiliary key.

See Owner's Manual -

Before Driving - Keys - [Auxiliary Key](#)

Then refer to Owner's Manual - Before Driving - Doors and Locks - [Unlocking with Auxiliary Key](#)

Theft-Deterrent System

The CX-30 is not equipped with a Theft-Deterrent System. **CAUTION:** DO NOT use MDARS to enable:

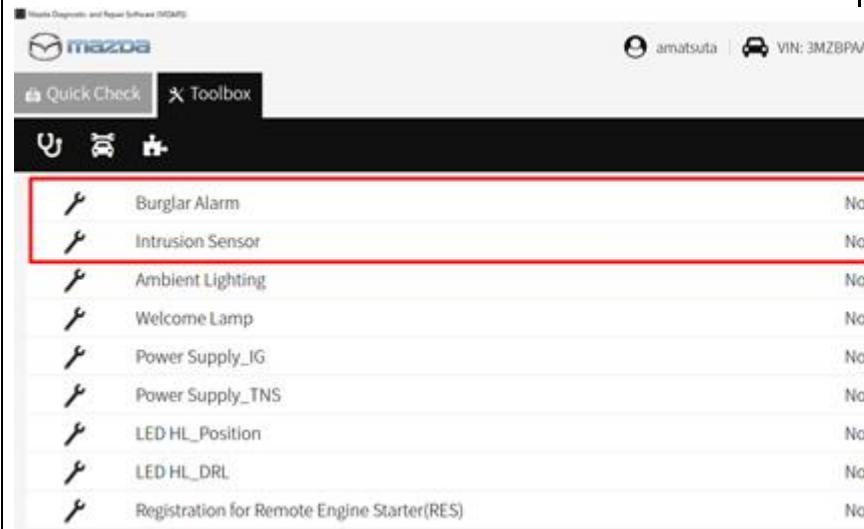

1. Burglar Alarm
2. Intrusion Sensor

The CX-30 does not have the necessary Theft-Deterrent System hardware to function if enabled using MDARS, and MDARS cannot disable the Theft-Deterrent System after it has been enabled.

The following DTC's may be stored if the burglar alarm or intrusion sensor are enabled:

1. B109F:87 - Intrusion Sensor Module
2. B2002:87 - On Board Charger DC/DC Low Voltage Side

Contact Hotline if the Theft-Deterrent System has been accidentally enabled.
