Figure 1. The display sporadically flickers.

### **Technical Background**

There are compatibility issue between the display and MMI software.

## **Production Solution**

New software in the lower MMI display addressed the condition.

### Service

#### **Required equipment:**

- ODIS Tester.
- SVM code.
- MIB2+ display software update on SD Card (see Required Parts and Tools or Download the software from MirrorServer using the SD Creator Program).

#### Time to complete update:

Approximately 20-30 minutes (includes 10-20 minutes for the software update and 10 minutes for the SVM work).

#### Service work:

The repair described below is only to be performed if the display (address word 0636) has software part number 4K1919605C and hardware part number 4K1919605 with software version 0141.

If the display has software part number 4K1919605C and hardware part number 4K1919605<u>C</u> with software version 0141, then the update is not necessary and cannot be performed.

For vehicles within the VIN range from \*KN000001 to \*KN058675 that have a front information display control head, J685 (address word 0636) with part number 4K1.919.605, please refer to TSB 2053875: *91 MIB2: Lower MMI (HVAC) screen image is distorted or flickering* prior to executing this bulletin.

• Update the MIB2+ display using either Method 1 or Method 2 according to TSB 2056558: 91 MIB2+ Software Update Instructions and use SVM code 636S002.

#### Method 1: Automated update using ODIS.
