

Safefleet has introduced new changes to the Defender Composite Stop Arms. These changes impact options available on Saf-T-Liner C2, Saf-T-Liner EFX, Saf-T-Liner HDX and our Minotour products. Changeover to the newly released design will be implemented on units with planned build dates of 5/25/2020 and later that are currently configured with the affected sales codes (see table below). The required change orders will be processed by TBB personnel.

- Changing LED lights from square lights to round lights
 - Same round lights as Defender Elec LED Stop Arms
 - Lights individually serviceable
 - Fewer service parts reducing inventory
- Motor shaft tapered vs. flat shaft
 - Common motor shaft, same as the Defender crossing arm
 - Improved shaft/driver securement
 - Fewer service parts, reducing inventory

(Incandescent lights will remain square in shape.)
