

The following information is for MY2020 DD5 engine updates.

For Detroit DD5 powered C2s with chassis build dates on or after 7/6/2020, new MCM software and fuel maps will be factory installed. These changes have resulted in new engine option codes and change orders will be processed to update units that fall into this category. The current engine code will be removed and the new corresponding engine data code will be added to these quotes (see table below).

For Detroit DD5 powered C2s on ground at TBB or FCCC 5/1/2020 or later built prior to the SOP date, technicians have been updating these units with the new software and fuel maps prior to being delivered. This effort was initiated as soon as the changes were approved by the regulatory groups allowing us to deliver your units without a need for additional updates. This is the exact software as used by the new codes applied in the factory.

For Detroit DD5 powered C2s delivered prior to software and fuel map changes being available, Detroit service campaign D20M7 is now released allowing these vehicles to be updated by your local certified technician. The field service campaign bulletin published on DTNAConnect provides step by step instructions for completing this programming as well as warranty information related to this campaign. Please contact the Detroit Customer Support Center at 1-800-445-1980 or e-mail csc@Daimler.com if you have any questions or need assistance completing this programming.

- As a part of the DD5 software updates, torque ratings were improved on 200HP & 220HP variants due to update in fuel maps to utilize low rpm torque.
- Improvements in Curb Idle Transmission Torque (CITT) ratings on Allison transmission variants is achieved in all 3 variants (200HP, 220HP & 240HP)
- Thus, new Data codes are created for all 3 engine options.

Data Code	Description	Improvement	New Code
101-2M2	2600rpm, 200HP/560 lbft	2600rpm, 200HP/ 620 lbft	101-3E5
101-2M3	2600rpm, 220HP/560 lbft	2600rpm, 220HP/ 660 lbft	101-3E6
101-2M4	2600rpm, 240HP/660 lbft	2600rpm, 240HP/660 lbft	101-3E7
