

We are pleased to announce the release of the Bendix Air Disc Brake Package with ADB22X axial mounted caliper for front and rear axles on the Saf-T-Liner C2. This new caliper mounting configuration provides a vehicle weight reduction and cost savings for the customer. This is the same caliper design used on our Saf-T-Liner HDX and Saf-T-Liner EFX today. Production changeover for this release applies to Saf-T-Liner C2 units with a chassis build date of 12/7/2020 or later. Units currently in our backlog with the Air Disc Brake Package and a chassis build date of 12/7/2020 or later will have change orders processed to update the vehicle quote.

The Bendix ADB22X axial mounted caliper:

- Decreases the overall vehicle weight
- Provides a cost reduction for customers
- Same caliper design as used on the Saf-T-Liner HDX and Saf-T-Liner EFX.
