

Introducing Saf-T-Liner C2 Jouley

New Information

We are very excited to announce that our C2 electric school bus, Jouley, is now available to order through our RACE configurator. Current rules allow you to build a universal school bus that will meet many customer configurations starting with sales option FL-101-3CP. Below are some combinations you will find when creating your order for this new product.

Features and Benefits

- Proven Proterra powertrain
- DC charging for faster recharging cycles
- Vehicle to Grid technology allows creative partnerships
- Up to 134 miles range in typical school bus application

Ordering

To initiate your Jouley order, select Proterra Electric: FL-101-3CP from the chassis powertrain group. This should add both TB/FL-001-351. Deselect from both body/chassis upgrades TB/FL-001-310.

There are limited production slots available for build dates in 2020 with this pre-series launch. Full start of production is scheduled for January 2021. More optional features and equipment will continue to be developed and made available at the full start of production.

See page 2 for additional information. For questions regarding your Jouley order, please contact Greg Webb (james.webb@daimler.com) .

Introducing Jouley – Electric C2 (eC2)

Current rules allow you to build a universal school bus that will meet many customer configurations. Please recognize not all options are available on Jouley that you may have on a traditionally powered bus. As our Jouley program continues to develop, we will bring more options online.

| General Guidelines and Rules | | |
|------------------------------|--|------------------|
| Wheelbases: | 259" | 310TS 311TS |
| | 279" | 340TS 341TS |
