

Portland Truck Plant Paint Changes (WST180)

October 13, 2020

Effective: Chassis Starts January 4, 2021

The Portland Truck Manufacturing Plant, which builds the Western Star 4700, 4800, 4900, & 6900 models, will transition to Axalta as the top-coat paint supplier with chassis starts as noted. The paint supplier change was made to provide consistency across all manufacturing locations.

Note that Axalta is the current top-coat paint supplier for the Cleveland Truck Manufacturing Plant which builds the Western Star 4700 and 5700 models.

The Truck Sales Order backlog will be updated by the CAE Paint Team. Truck Change Orders will be issued; there is no price impact.
