Service Bulletin

Service Bulletin - Technisches Rundschreiben - Circulaire Technique - Circular Tecnica

Date: **20 November 2020**

Subject: **Fusecase cover**

Product: **Brutale 1000 Serie Oro - RR - Rush**
from vin ... LV000011 to vin ... MV000546

Following continuous monitoring of the quality of our product, it was found that for the Brutale 1000 Serie Oro - RR - Rush motorcycle you purchased it is necessary to check the passage of the starter relay connector wiring and the presence of protective rubber pads on the edge of the sound absorbing panel.

If the passage of the wire is not correct, the aluminum cover could damage or crush the wiring of the starter relay connector:

The same problem could occur following the absence of protective rubber pads on the edge of the sound-absorbing panel.

We ask you to check and possibly updateduring the pre-delivery phase, during a maintenance service or at the first useful opportunity at your workshop.

NON-CONFORMING PART IDENTIFICATION PROCEDURE:

It will be possible to identify the motorcycles that needs to be updated by removing the aluminum cover on the left side of the bike, using a 4mm Allen key and acting on the quick release screw, and checking the points indicated below;

Position of the cover (on both B4 and Rush models):

Main relay cable routing:

Presence of protective rubber pads on the sound-absorbing panel:

On the motorbike it is possible to find 4 assembly variants with different actions to be taken according to the configuration found on the vehicle. It is possible to proceed with only one action to be taken:

	CABLE ROUTING	RUBBER PADS	ACTION TO BE TAKEN
1	COMPLIANT	COMPLIANT	NO ACTION REQUIRED
2	COMPLIANT	NOT PRESENT	POINT A
3	NON-COMPLIANT	NOT PRESENT	POINT B

REQUEST FOR WARRANTY REFUND FOR LABOR (PHASE 1):

To obtain a refund for the labour, in addition to the complete motorcycle data, it is necessary to send a Warranty claim using the following information:

- Warranty type = 3 options available:
 - New motorcycles in stock NOT REGISTERED = **GP**
 - Motorcycles sold with activated warranty = **GC**
 - Motorcycles sold with expired warranty = **GE**
- Operation code: **X999** with labour time of 0.2 hours
- Problem code: **099**
- Problem date: **date of insertion of warranty claim**
- Spare part code: see the codes reported in the chart above
- It is also mandatory to include the reference "**CT 260**" in the warranty claim's notes.

WARRANTY CLAIM (STEP 2):

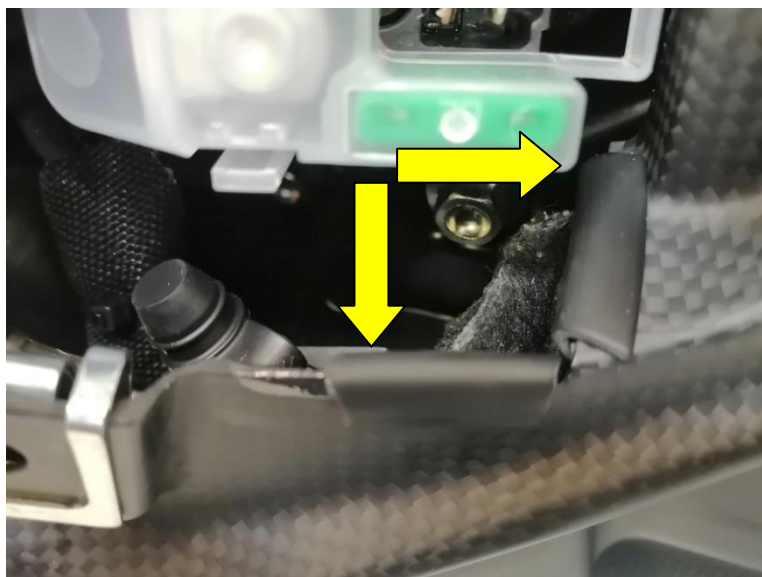

After the validation of the warranty claim by the MV Agusta Technical Assistance Service, you will automatically receive the spare parts selected to update your vehicle.

Once the update has been carried out, it will be necessary to complete the Warranty Request procedure by entering the repair date: the insertion of the repair date in the warranty request is valid as certification of the reclamation of the motorcycle by the dealer and also allows the payment of labour concerning the work performed.

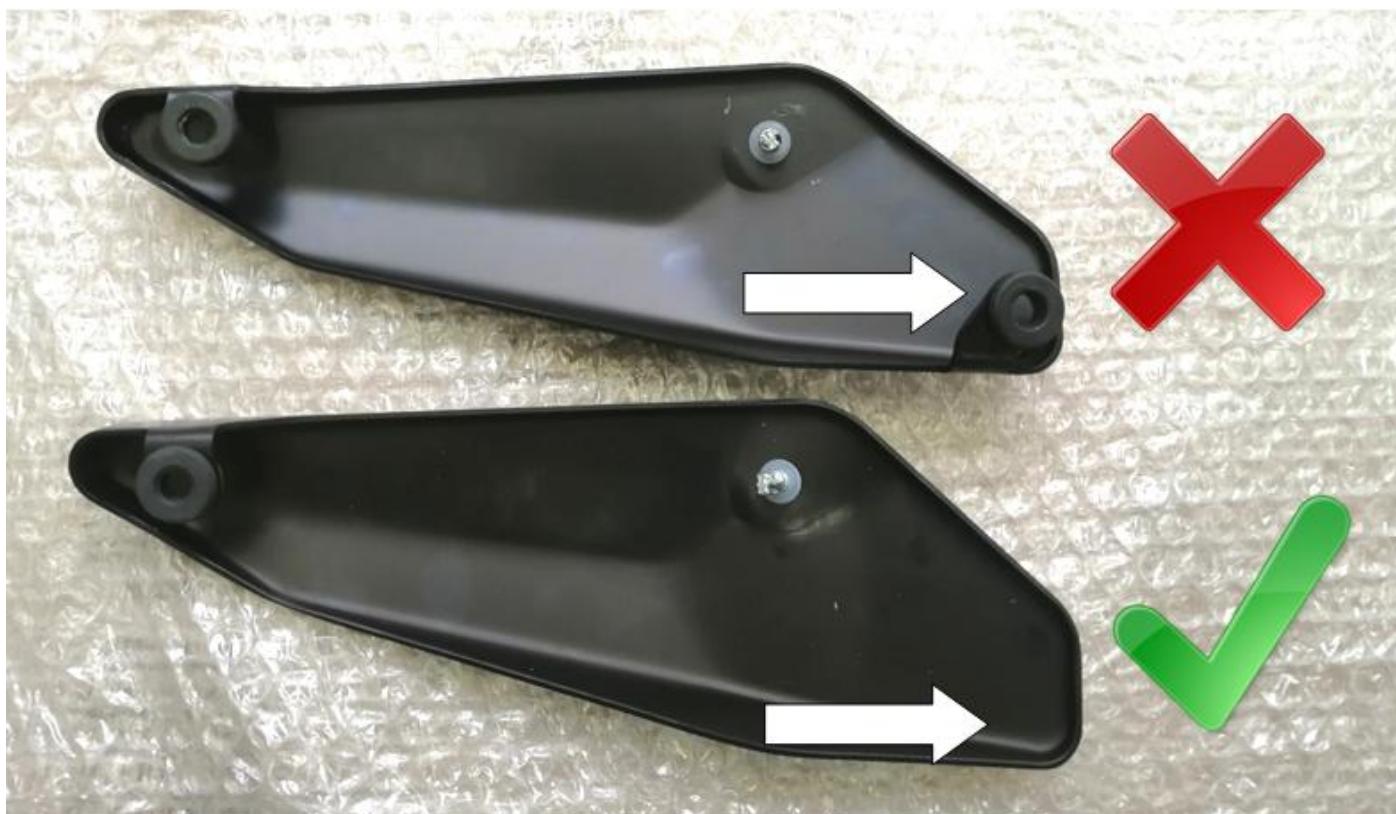

NOTE: we remind you that according to the new features and warranty management procedures, the insertion of the repair date is essential and mandatory as per technical communication no. 004/17.

Detail and application of the parts:

- code **8B00B4458** protective rubber pads: they must be applied to the edge of the sound-absorbing panel as shown in the figure using the layer of adhesive already present inside the surface of the rubber pads:

- Code **8AA0C6352** modified cover: the modified cover replaces the original one on the vehicle (removed one of the fixing support to avoid contact with the wiring):

Thanking you in advance for your cooperation, we remain at your disposal for any technical / commercial support.

Best regards,
