Case Number: S2008000121

Release Date: 08/19/2020

Symptom/Vehicle Issue: Right Front Parking Lamp LED Halo Does Not Illuminate

Customer Complaint/ Technician Observation: Owner says the right front parking lamp halo does not illuminate. Technician observed the halo ring around the headlamp was not illuminating on the right side.

Discussion: Check the voltage output at the head lamp connector D6606A, L118 circuit or the BCM pin 5 C1 connector. If voltage is not present with lamp on, inspect the harness routing as shown for any damage or terminals connections as needed. No DTC's setting or warning messages, see Fig 1, 2, 3.
