

SAFETY RECALL VB2 ENGINE COOLING FAN

Parts Ordering

Please note that the parts listed below must have a VIN accompanied with the parts order.

- **CSNJVB21AA**
- **CSNJVB22AA**
- **CSNJVB23AA**
- **CSNJVB24AA**

This can be done outside of the “VIN Specific Order” process as part of a normal Daily Order. See below for detailed instructions.

1. On the NORMAL order entry screen, where multiple parts can be entered, the dealer starts with a Daily order type on the header.
2. The order detail screen now has a column for VIN entry. If a part being ordered requires a VIN, the screen edits will ask for the VIN to be entered.
3. If the VIN is entered for the parts ordered, the system will check to ensure the part has not already been ordered for this VIN and make sure the VIN is eligible for the recall.

Parts for Multiple VINs can be ordered on the same order

Non VIN Specific parts can also be included in the order.

Please note: Occasionally a VIN Specific Part will also be on a quantity restriction. If you are above your allocation the order will not go through.
