Section:	8

Model: **GTC4 LUSO** *Portofino*
GTC4 LUSO T

Subject: Procedure for replacing Infotainment Node (NIT)

Please note that the latest versions of the **Infotainment Node (NIT)** software of the aforementioned models include a number of features which are only functional if the appropriate **Instrument Panel Node (NQS)** software version is also installed.

On vehicles without **ADAS**, installing an **Infotainment Node (NIT)** with an incorrect software version will cause other on board systems, such as the camera system, to malfunction.

To avoid issues, when replacing the **Infotainment Node (NIT)** on a **GTC4 Lusso**, **GTC4 Lusso T** or **Portofino** **WITHOUT ADAS**, please contact the Ferrari Helpdesk (Technicalsupport_FNA@Ferrari.com) to ensure that the software versions of the components are correct.

Thank you for your co-operation.
