radio wont turn on with the key but only push button Dec 29, 2020 2:49 PM

2021 Cascade radio issue, it wont turn on when the key is on but when you push on the button it comes on and wont turn off until you unplug it

You have to push on the SCR button for 3 seconds to turn it off.

There was a radio software update for earlier versions of the PanaPacific DEA5XXXX distributed, Delphi radios. That should not apply to your 2021.

Just guessing but could it be your radio is not receiving an ignition signal. Schematic G66-04663-000, but I can't say that for sure without a VIN.

The position of fuse 19 (A/B) will make a difference on this. Try switching the fuse position for the preferred radio operation.
