Service

Parts replacement does not solve this issue. Claims for replaced parts will be subject to review.

If the above condition and DTC are present, perform the replacement test plan for the Gateway, J533 (address word 0019) as follows:

 At the first prompt, use selection 2 – New control module (Figure 2).

What control module is currently installed?

-1- Old control module -2- New control module Entry: - 2 -

Figure 2. First prompt.

2. At the second prompt, use selection 1 – No SVM code (Figure 3).

 Check whether your ordering system/parts catalog (e.g. ETKA, special note, ...) or one of the available Technical Service Bulletins (TSB) indicates a SVM code (e.g. XCHG...).

Does your ordering system/parts catalog (e.g. ETKA, special note, etc.) or one of the available Technical Service Bulletins (TSB) indicate a SVM code?

-1- No SVM code -2- SVM - Code exists Entry: -1-

Figure 3. Second prompt.

- 3. Follow the on screen prompts.
- 4. Once complete allow a 10 minute sleep cycle and re-check the operation. Drive select functions are now restored and the DTC can be cleared.
