hk0742, freightliner, cascadia. i replaced acm and programmed it to truck i then updated other modules, but it failed during tcm update, and now software part number is not available. any ideas? it still lets me connect to tcm. Jan 12, 2021 6:49 PM

I need some help with this tcm issue, if u can help I appreciate it thanks joe.

Hard to follow what happened. Is the TCM missing the software Part Number? or the ACM?
