Model: **SF90 STRADALE**

Subject: Logistic Mode deactivation on HVB battery (High Voltage Battery)

We would like to inform you that the instructions for deactivating the **Logistic Mode** of the **HVB** battery (**High Voltage Battery**) of the aforementioned model are provided below.

The procedure is different depending on the software version of the **DEIS** diagnostic tester:

- **DEIS version 5.4.0.3 or 5.4.0.4**
Contact the **Help Desk Ferrari** (via **ROL** or at the email address **Technicalsupport_FNA@Ferrari.com**) and request an “**HVB logistics mode deactivation activity**” to be uploaded to the DEIS server. Performing the activity will remove the logistics mode
- **DEIS Version Alpha 6.0.0.0**
The Logistic Mode can be deactivated directly using the “**HVB SOC Logistic Mode**” cycle in the **HVB** control unit.

Thank you for your co-operation.
