powertrain pdm label Jan 5, 2021 2:51 PM

Hey guys does anyone know where the label that comes on the powertrain pdm cover that shows fuse and relay locations for the specific vehicle can be viewed by the tech or purchased by the customer in parts pro or ez wiring? we can use vin# BZ0957 for this example. Nobody here in parts or service has ever been able to find it

Re: powertrain pdm label Jan 5, 2021 3:17 PM

BZ0957

Parts List: 286-C14512KIT-ELEC,PTPDM,CUMMINS ALLISON: A06-74512-019

:LABEL,ELEC,PDM,CUM,ALI,M2 - 24-01641-005Can view a picture of it in Exceleator - picture no longer available in EZWiringLots of stock in Paragon

What is Exceleator? I am also trying to look at a PTPDM label drawing.

Edit: I found the Exceleator program in DTNA Connect but the part number I have for the label I'm looking for is 24-01885-000 and there is no image in there.

I see that, says image coming soon - at this point you'll want to contact parts technical and see if they can release the drawing to you.
