# WMB4 Stop Delivery – Replacing 19.2 kW high-voltage charger (OBC)

## Vehicle blocking

**DEALERS SHOULD NOT SELL, WHOLESALE, LEASE, RENT OR LOAN ANY VEHICLES AFFECTED BY THIS ACTION IN DEALER INVENTORY UNTIL FURTHER NOTICE.**

## Overview

On the affected vehicles, there is a possibility that the on-board high-voltage charger (OBC) does not meet specifications and could malfunction, preventing AC charging.

To help prevent this from occurring, Porsche will replace OBC on the affected vehicle prior to delivery to customers.

<b>Model line</b>	Taycan (Y1A)
<b>Model year</b>	2021
<b>Manufacturing period</b>	Between 12/23/2020 and 2/9/2021
<b>Vehicle specifications</b>	22kW on-board AC charger (I-No. KB4)
<b>Number of affected vehicles</b> 253	253

## Vehicle usage

Porsche does not recommend using the potentially affected vehicles prior to remedy because the AC charging process may become interrupted.

Note: If the vehicle needs to be charged and AC charging has malfunctioned, the vehicle can still be charged using DC charging function.

## Test instructions and remedial measures

Will be communicated once available.

### Note:

All 253 affected vehicles are currently en route to US ports or at US ports and will be released from the respective ports when the required remedy parts become available for repair at dealers.

The first units are expected to be released to dealers mid-March and continue into May.

## Subsequent procedure

Please inform all relevant dealer staff of this announcement.

The stop delivery campaign is also assigned to the affected vehicles in PCSS and can be viewed within this system.
