It looks like there is too many numbers for the SPN. When P4 came out. They never finished loading all the fault codes into the system. Something like this. I would use the call center.

Re: Fault Code Information Missing. P4 CTP01T 523512/31 Feb 9, 2021 12:06 AM

Might not be too many digits. It needs a space between CTP01 and 523512.

I agree the call center might have more info on that SPN.

Re: Fault Code Information Missing. P4 CTP01T 523512/31 Feb 9, 2021 10:45 AM

Thanks Talbert. I have displayed the code the exact way it was displayed in DDDL8. It is not in the manual. Will be contacting the CSC.
