Technical Service Information Bulletin

2.0 Overhead Display Replacement Notification

Date: February 08, 2021

Bulletin Name: FDM-TSIB-019

Model: Oshkosh S-Series

Units Affected: MY 2020 and newer Front Discharge Mixers

Purpose:

This bulletin provides general information about updating the Oshkosh ClearSky™ team when a vehicle's overhead display is changed/replaced. Disruption of ClearSky™ telematics service will be experienced if the steps in this bulletin are not followed.

Display Information:

Contact the ClearSky™ team at **920-204-1086** or email **clearskysupport@oshkoshcorp.com** for assistance on what action is needed before replacing/changing an overhead display.

When replacing/changing the overhead display in a vehicle the SIM card from the original device must be removed and inserted into the new/replacement display. Failure to transfer the SIM card that originally came with the vehicle's display will prevent ClearSky™ telematics from functioning.

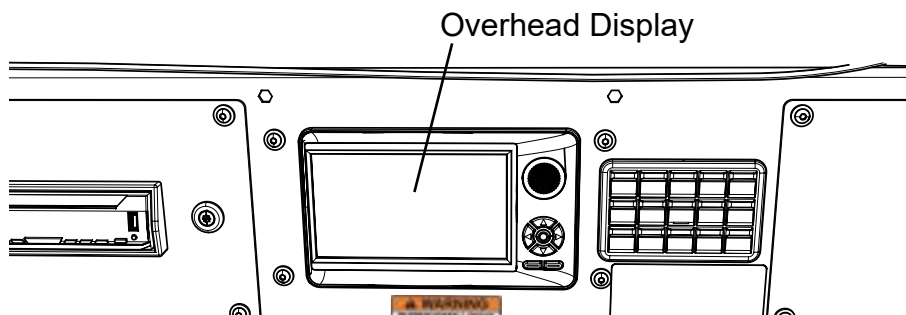

Figure 1 Overhead Display

Swapping displays from vehicle-to-vehicle without changing SIM cards is not acceptable as the SIM card in the display is vehicle specific. Contacting the ClearSky™ team if swapping a display from vehicle-to-vehicle is a must, see contact information above.

Continuous Improvement:

The change included in this document is part of the McNeilus Continuous Improvement Process.

McNeilus's quality policy is providing customer satisfaction through innovative products, dedicated service, and a constant focus on continuous improvement.
