

BREEZE LED 360™

LED LIGHT & BATHROOM FAN

New bright LED illumination produces 1,000 lumens eliminating the need for a 60-watt bulb

Improved damper reduces moisture, odors and mildew

Automatically opens and closes with fan

No more light bulbs to buy or replace reducing operating costs

BREEZE LED 360™
LED LIGHT & BATHROOM FAN

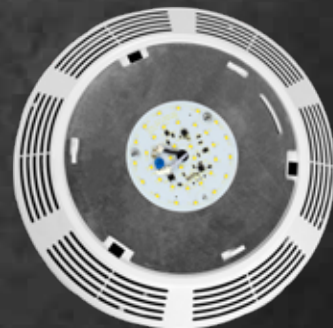

DEXTER BATH FAN WITH LED LIGHT

Dexter's LED-illuminated ceiling bathroom ventilation fan helps keep mirrors and windows from fogging during showers. The new damper opens and closes with the fan and remains closed when the fan is off. Having the damper closed reduces moisture, odors and mildew. The low profile Breeze LED 360 is available with a powerful 50 or 75 CFM fan and 34 LED lights that produce over 1,000 lumens. The V2281-50 120V 50 CFM and the V2281-75 120V 75 CFM LED lighted bath fans use a standard 3" diameter outlet and are UL/CSA certified and Made in America.

The department of energy reports that an LED bulb will last up to 30,000 hours versus 1,000 hours of a 60-watt incandescent bulb, saving both time and money by eliminating the need to change bulbs so frequently. Additionally, LED's save on your energy bills by using significantly less power.

BATH FAN FEATURES

- Low profile ceiling exhaust fan
- Contemporary styled white cover
- Powerful exhaust fan available in two models; 50 (V2281-50) and 75 (V2281-75) CFM
- Integrated LED's produce 800 lumens
