Product Change Notice – 3000 Series C-Hinge Notch Removal

Dear Valued Customer:

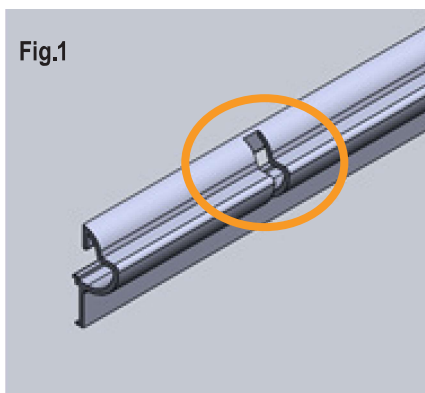

As part of our ongoing efforts to improve product performance, we will be removing a process notch and set screw in the C-Hinge of 3000 Series windows.

The function of the notch and set screw was to reduce lateral movement of the vent. The new design includes lengthening the hinge by 1/8" for improved stability of the vent. Removing the notch will also standardize production processes across the windows division.

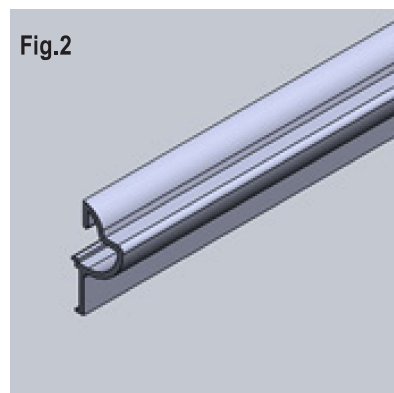

This applies to all 3000 series windows using the c-hinge in the area circled in (Fig.1). A set screw will still be applied to double vented windows between the two vents. The change does not affect operation of the window. There is also no change in installation for the OEM customer.

The change will be made on a running basis, starting immediately.

Current

New

Products affected are: 3000 Series - SV, SVD, SVD T-Bar, EPW

If you have any questions, please feel free to call me directly or your LCI representative. We value and appreciate your business and partnership.

Sincerely,

Troy Whetten
