Golf	2020	1.4T (DGXA)	All	All	All

Revision Table		-	_
Instance Number	Published Date	Version Number	Reason For Update
2062520/1	3/3/2021	01-21-07	Original publication.

Tip:

This software update also includes modification for: P0133, P2279, P0135, P060C, P0410, P0491 and P268A DTCs.

One or more of the following fault codes may be stored in the Engine/Motor Control Module -*J6*23- Fault Memory:

DTC	Description
P0133	O2 Sensor Circ., Bank1-Sensor1 Slow Response
P2279	Intake Air System Leak
P0135	O2 Sensor Heater Circ.,Bank1-Sensor1 Malfunction
P060C	Internal Control Module Main Processor
	Performance (Symptom Code 30923 ONLY)
P0410	Sec.Air Inj.Sys. Malfunction
P0491	Secondary Air Injection System (Bank 1) insufficient flow
P268A	Fuel Injector Calibration Not Learned/Programmed

Information contained in this document is based on the latest information available at the time of printing and is subject to the copyright and other intellectual property rights of Volkswagen Group of America, Inc., its affiliated companies and its licensors. All rights are reserved to make changes at any time without notice. No part of this document may be reproduced, stored in a retrieval system, or transmitted in any form or by any means, electronic, mechanical, photocopying, recording, or otherwise, nor may these materials be modified or reposted to other sites, without the prior expressed written permission of the publisher.

I Note:

DO NOT diagnose or replace components due to P0133, P2279, P0135, P060C, P0410, P0491 and P268A faults **before** performing the update function as explained in this bulletin.

Technical Background

Updated programming of the Engine/Motor Control Module -*J623*- software is based on most recent engineering experiences and makes this knowledge available for the monitoring strategies.

Production Solution

Improved ECM software.

Service

Update-Programming Procedure:

<u>Critical Warning</u>: The Midtronics battery charger <u>must</u> be connected to the vehicle battery for the duration of the programming, to ensure the battery state of charge remains above 12.5 volts during the update process. If the battery drops below 12.5 volts, the programming could fail which may result in damage to the control module. Control modules damaged by inadequate voltage will not be covered under the warranty policy. The technician should verify the vehicle voltage prior to starting the update process, and should monitor the voltage for the duration of the update.

Radiator Fan(s) may cycle ON high speed during the Update Process! There is a risk that personal injury may result if contact is made with spinning fan blades.

Keep hands and all objects away from Radiator Fan(s) during Update Process!

I Note:

Prior to launching the ODIS Service diagnostic applications and starting control module update process, confirm tester screen saver and power settings in accordance with Diagnostic Device Hardware & Windows® - VHW-20-02 Change Power Options After Windows®10 Upgrade. Failure to do so may result in the tester entering power save mode during data transfer, and subsequent control module failure. When using a VAS 6150/X or 6160/X tester in conjunction with a VAS 6154 wireless transmitter head for a flash procedure, connect a USB cable between the transmitter head and the tester. Failure to do so may lead to errors during the flash procedure.

VAS tools must only be used with their power adapters plugged in. Under no circumstances should they be used on battery power alone during the programming procedure.

i Tip:

To Update-Programming using Software Version Management (SVM), **review and follow** instructions in **Technical Bulletin Instance 2014603** "Software Version Management".

The SVM process must be completed in its entirety so the database receives the update confirmation response. A warranty claim may not be reimbursed if there is no confirmation response to support the claim or action is carried out that is not explicitly stated in the Technical Bulletin.

• Update the Engine/Motor Control Module -*J623*- using the SVM Unit code as listed in the table below:

Model	Engine	Old Software Part No.	Old Software Version	New Software Part No.	New Software Version (or higher)	SVM Unit Code
Golf	1.4T (DGXA)	04E 906 024 AD	Z843 7256 9508 9939	04E 906 024 AD	9970	45D3
		04E 906 024 AC	Z843 7255 9507 9938	04E 906 024 AC		

The procedure can be found in GFF under Functions/ Component Selection, Software Version Management, Adapting Software.

🚺 Tip:

The procedure can be found in GFF under Functions/ Component Selection, Software Version Management, Adapting Software.

Ensure attached ECM/TCM Tuning Form has been completed and signed by customer as required in SVM Technical Bulletin Instance 2014603.

OWNER INFORMATION ABOUT CONTROL MODULE TUNING* ACKNOWLEDGEMENT AND AUTHORIZATION FOR REPROGRAMMING (REFLASHING) OF CONTROL MODULE(S)

*) "TUNING" is described as the addition of or modification of any component which causes a Volkswagen vehicle to perform outside the normal parameters and specifications approved by Volkswagen Group of America / Volkswagen Group Canada.

Date:	
Dealer Number:	_
Vehicle Identification Number:_	
Repair Order Number:	

Dealer stamp

_____, owner or driver of the above identified Volkswagen, confirm:

"Tuning" as described above (especially power increasing modifications) has NOT been performed on my vehicle.

"Tuning" as described above has been performed on my vehicle and the following components were modified or installed:

<u>TUNING was performed by (Please provide Company name and telephone number, if you wish us to contact them):</u>

I understand that if my Control Module is determined to have been tuned, any damage caused by the tuning of the Control Module (including adverse emissions consequences) will not be covered by VWGoA / VGC warranties.

I am permitting an authorized Volkswagen Dealer to reflash (update) my Control Module, and by doing so, I understand that this process will automatically overwrite (destroy) and permanently delete any tuning program that was previously installed on the Control Module of my Volkswagen vehicle.

By signing below, I fully acknowledge and understand that the tuning program will not be restored and VWGoA / VGC, will not be liable in any way for the loss of tuning data.
