Customer states:

- There is a delay of power steering assist after the engine restarts from a Start/Stop event.

Technical Background

If the engine is off during a Start/Stop event and the brake pedal is released, the car starts to move forward in creep (without applying the throttle) but the power steering has no assist for a short period of time.

The vehicle is operating as designed.

There are no DTCs stored in the power steering control module, J500 (address word 0044).

Production Solution

Improved software for MY 21
