## TECHNICAL SERVICE BULLETIN

SUBJECT: SERVICE REMINDER SETTING RESET PROCEDURE

### \* NOTICE

This bulletin has been revised to include additional information. New/revised sections of this bulletin are indicated by a black bar in the margin area.

This bulletin provides the procedure to turn OFF the service reminder lamp, at the first service interval reminder alert that will display on the instrument cluster. The KDS is required to change the setting from 'Workshop' to 'Customer Mode'. During the KVID PDI, the first service interval is set at 6,000 miles for Turbo engines and 7,500 miles for Non-Turbo engines. This function can also be used if the customer decides they would like to set the service interval at Severe vs Normal schedule that was set during the PDI. Dealers and customers should always set the service interval as a reminder when the oil service and/or other maintenance are performed. Follow the procedure listed in this TSB to properly set the cluster to customer mode.

Kia Diagnostic System (KDS)

Printed TSB copy is for reference only; information may be updated at any time.  
Always refer to KGIS for the latest information.

Circulate To:  General Manager  Service Manager  Parts Manager  
 Service Advisors  Technicians  Body Shop Manager  Fleet Repair

**Service Reminder Setting Change Process:**

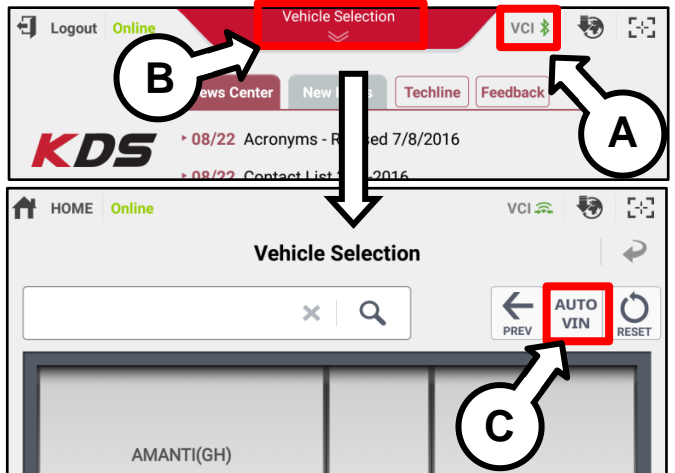

1. Connect the VCI-II to the OBD-II connector, located under the driver's side of the instrument panel.

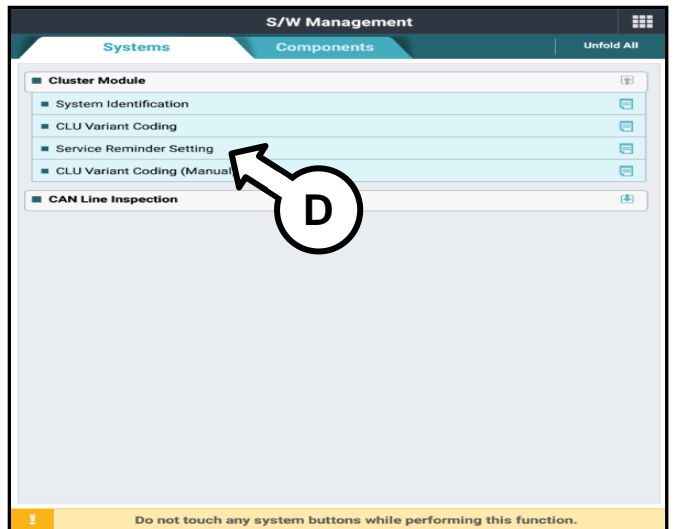

2. With the ignition ON, turn ON the KDS tablet. Select **KDS** from the home screen.

3. Confirm communication with VCI (A) and then configure the vehicle (B) using the **AUTO VIN** (C) feature.

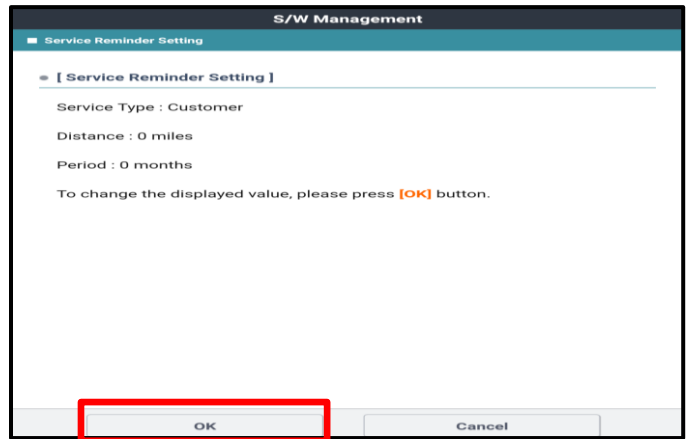

4. Select **Cluster Module**, then **Service Reminder Setting** (D) in 'S/W Management' menu.
