**Freightliner
Service Bulletin**

Description of Revisions: *This bulletin replaces the version dated 8/15/2018. The guidance for locating the serial number for key fobs has changed. It is no longer necessary to document the serial number in PartsPro.*

General Information

Key fobs for remote keyless entry on New Cascadia vehicles are delivered in packages that include a unique ID for the fob. See [Fig. 1](#). The ID is required when pairing the key fob with a vehicle.

If the ID is lost, the fob cannot be paired with a vehicle. The original vehicle Key FOB ID can be located via the DTNA Connect app "Vehicle Information," by entering the last six characters of the VIN and selecting "Vehicle Major Components." See [Fig. 2](#).
