

## **SSM 49645: 2021 Bronco Sport Headlamp Dark Spots Pattern**

All 2021 Bronco Sport vehicles have headlamp low beam pattern with a dark spot dip near the horizon in the left portion of the beam pattern. These dark spots are most noticeable when the high beam is active. Although this dark spot is present by design, this issue may be more perceivable to the customer if the headlamps are aimed too low (dark spot will appear closer to vehicle). The vertical aim should be checked and adjusted upwards if necessary, refer to Workshop Manual (WSM) Section 417-01.

Vehicles:

2021 Bronco Sport (CX430) (HD) 2021 Mustang Mach-E (CX727N) (GW) 2020-2021 Explorer (U625N) (TW)
