Product Change Notice - New end cap for manual awnings

Dear Valued Customer:

Please be advised Lippert has made changes to the end cap and rod for manual awnings.

The new rod is now machined with a smaller diameter section on the end to fit the new end cap, which has a smaller hole. The change is being implemented to streamline production processes by making the power awning end caps and manual awning end caps more easily differentiated. The manual end cap will only fit on manual awnings.

There is no change to installation or operation of the awning with the new rod style and end cap. There is no price change and no part number change. For replacement and warranty claims both the rod and end cap will need to be replaced. The new end cap will not fit on the old rod and vice versa. The change will be made on or around mid to late March.

**Machined
smaller
diameter for
new cap**

If you have any questions, please feel free to call me directly or your LCI representative. We value and appreciate your business and partnership.

Sincerely,

Mason Ogle

VP of RV Sales
