Product Change Notice - 5000 Series Patio Rail Kit

Dear Valued Customer:

Please be advised Lippert intends to make changes to the 5000 Series Patio Rail Kit.

A panel attachment method has been changed from a J-lock (Fig. 1) to a bungee cord (Fig. 2). The J-lock holds the rail panel in place when the panel is lowered (not pictured) and the lock is turned a quarter turn. The bungee cord serves the same purpose. A bungee cord has also been added to the back of the rail to hold the panels upright in open position (Fig. 3).

We also intend to switch from a spring plunger to a compression washer (Fig. 4) to hold the foot lock in place.

The change is being made on a running basis, starting immediately.
