Suspended Accelerator Pedal uncomfortable for ice road operation

Vehicle Information

VIN: 5KJJAIEFG1MPMT8495

Model: WJ121086 T

Model Year: 2021

Mileage: 46215 kilometers

Make: Western Star

Are you currently seeing this same issue on other DTNA vehicles at your location?: yes

Base Model: 4900 FA

Vehicle Systems Involved

ELECTRICAL

We have tis customer who bought a new 4900, his old 4900 had a floor mounted accelerator, this new one has a suspended. The distances are a bit different and he finds it uncomfortable at slow speeds. On ice roads the speed limit is 15 kph or less and they run for hours like this.

We chaged his suspended pedal to a floor mount with ease.
