## DCMD failed, not working at all

### Vehicle Information

VIN: 3AKJHHDR4MSMA6042

Model: NEW CASCADIA 126 INCH  
SLEEPERCAB

Model Year: 2021

Make: FTL

Mileage: 25015 kilometers

Base Model: PT126SLP

Are you currently seeing this same issue on other DTNA vehicles at your location?: no

### Vehicle Systems Involved

ELECTRICAL

OTHER SYSTEM (DCMD)

Hi, here is what happened to me today. Truck came in with a complaint that driver window, door lock, dome light and mirror adjustment not working.

First thing I've done was to disconnect battery for a good 5 minute. Not working.

Second, connect with DL8, no fault code. Get into the windows template screen, then I noticed that the "return control to vehicle button was clickable", I hit it. Dome light turn ON, and everything on that switch panel has come back. Wasn't able to duplicate trouble after that.

An other computer issue to my mind. How to explain it? I'll try to pay attention for future comeback for that truck.

Is there any water intrusion at Deutsch connector, inside the door. Usually causes AAT codes. [NEW CASCADIA MIRROR AAT CODES](#) has some pictures of the connector and where the water comes from.

Whether you think you can or you think you can't, you're right. – Henry Ford
