

WMA7 Workshop Campaign - Performing software update for charger (Porsche Mobile Charger...

Version 1

WMA7 Workshop Campaign - Performing software update for charger (Porsche Mobile Charger Connect)

Overview

Software optimizations are available for the Porsche Mobile Charger Connect (software version VR12.1.1).

The software update contains general fault corrections and function enhancements such as encrypted communication between the charging equipment and vehicle for secure information exchange, a new display format during charging including the display of vehicle information, battery status and remaining range as well as the "Plug & Charge Private" function. This function allows automatic detection of vehicles already registered in Mobile Charger Connect when you plug in the charging cable without also having to enter your PIN.

For vehicles where WMA7 is open in PCSS, this campaign must be carried out **after** the campaign WMA5 (Taycan MY 2020) or WMA6 (Taycan MY 2021) so that the Porsche Mobile Charger Connect software version is also VR12.1.1.

Please arrange for this measure to be carried out on the affected vehicles during the next workshop visit or before vehicles are handed over to customers.

The Porsche Mobile Charger software must therefore be checked and updated if necessary on the affected vehicles.

Model line	Taycan (Y1A)
Model year	2020 - 2021
Vehicle specifications	Porsche Mobile Charger Connect
Number	5,240

Required software and adapter

PIWIS Tester 3 test software version	40.000.018 (or higher)
VAS 611 009 - Diagnostic adapter for high-voltage charging system	

Warranty processing
