POWERTRAIN

High Pitch Noise when Turned to Full Lock

19MY – Onward Range Rover, RR Sport, Defender MHEV

Customer Voice:

- There is a noise when turning the steering wheel.

Technical Description:

- A high-pitched whine noise is noted when the wheel is approaching and at full lock position.

Status:

- The complaint may be electronic noise related to system voltage load.
- Diagnose and resolve voltage related DTCs as per the related **TOPIX Workshop Manual DTC Help Text in the relevant section 100-00** and Pathfinder Guided Diagnostics then re-evaluate the noise complaint.
