Creak Noise From Glass Roof Panel

20 – 21MY RR Evoque, 18 -21MY E-PACE, 17 – 21MY Discovery

Customer Voice:

- A customer may report a creaking type noise coming from the roof glass area while driving at low speeds and/ or rough ground.

Technical Description:

- The roof glass panel flip seal may produce a noise with its' interaction with the vehicle body.

Status:

- TSB **JLRTB02079NAS1** is being published to address this concern.
- The procedure will consist of cleaning the flip seal and vehicle body and treating the seal with Carbaflo KSP 105 lubricant.
- Should a customer express a concern, please refer to this TSB.
