

Technical Service Bulletin

43 Air suspension compressor, the measure value block is incorrect in the suspension control module

43 21 45 2062932/1 April 9, 2021.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
A6, A7	2018 - 2021	All	Adaptive suspension

Condition

Customer states:

- No customer concerns, it is found during PDI or any other diagnostic work.

Workshop findings:

- When checking the compressor output using the ODIS tester (address word 0074), the measured value “*Accumulator pressure* and/or *System pressure*” may be shown as over 25 bar.
- The pressure shown over 25 bar is not the actual pressure in the system.

Technical Background

In some versions of suspension control module, J775 (address word 0074), the measured value *Accumulator pressure* and/or *System pressure* is shown incorrectly on the ODIS tester.

Production Solution

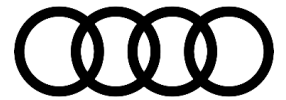

Not applicable.

Service

If this occurs, use the special tool for air suspension VAS 751 001 to determine the actual pressure in the system to check the compressor output.

Warranty

This TSB is informational only and not applicable to any Audi Warranty.
