Case Number: S2108000073

Release Date: 03/17/2021

Symptom/Vehicle Issue: Selectable Steering Modes In Radio Not Available

Discussion: The Selectable Steering Mode, a base option is not included with the upgraded package on the R/T "Tow N Go" (AAN) option. This performance upgrade has optional Performance Tuned Steering, sales code (SBX) that replaces standard power steering (SBL) system. Some steering mode changes are available within the customer drive mode selections. Hard button controls are located in the lower ICS (Integrated Center Stack) see owner manual. The Tow N Go optional upgrade does replace the base model individual selectable steering option highlighted by sales code (XX7) Individual Selectable Steering. No further repairs should be attempted on vehicles equipped with the (AAN) package.

NOTE: Optional Equipment May Replace Standard Equipment – see window sticker
